

COMMUNITY RELATIONS

Policy 804.8.4 (previously 1004.8.4)

Media Productions Using School Facilities

Board facilities and resources may be used for media productions when there is a clear understanding that the instructional programs in the schools and the image of the District will not be compromised.

Board support and cooperation are extended on the basis of contractual arrangements involving the school, Board and media company. The District's association with media productions will be on a cost plus basis and the District must be provided with appropriate liability protection by the media company.
